NABS 2011 Program Committee

Co-Chairs: Cliff Dahm and Stuart Bunn

Coordinator: Judy Li

Local Arrangements: Brian Shelley, Maria Aliberti-Lubertazzi, Henry Walker

Sessions Coordinator: Todd Royer

Committee Members: Carol Couch and Colden Baxter

NABS 2011 Elected Officers

Lucinda Johnson, President

Joe Holomuzki, President-Elect

Sue Norton, Secretary

Mike Swift, Treasurer

Acknowledgments

Grateful acknowledgments to the following members and colleagues for their help in planning and executing this meeting:

Local arrangements: Peter August, Brian Richter; Providence Warwick Convention & Visitors Bureau

Logo Design: Olivia Verdugo, Rhode Island School of Design

Field trips: Scott Comings (Block Island TNC); Sophia Fox (Cape Cod National Seashore); Rupa Datta (Save the Bay, Narragansett Bay)

ALS fundraisers: Nancy Feroldi (RI ALS Chapter); Mike Barbour; Mulholland family

T-shirt Design: Katy Dika, Rhode Island School of Design

Music makers: Fred Benfield, Sue Norton, Michael Paul and friends

Help way beyond the call of NABS committee duties:

Erin Hotchkiss; Tina Mendez; Donna Kashian; Dave Feldman; Al Steinman; Sherri Johnson

SPECIAL ACKNOWLEDGMENT to artists Laura Hartsell and Henrik Søderstrøm for their art installation "Intimate Immensity" and to Neil Oberstrom and the Rhode Island School of Design Nature Laboratory who generously offered their space to house the exhibit.

Our thanks for the support of Graduate Students Awards to the following sponsors:

- YSI Environmental
- Elsevier/Academic Press and NABS
- Camp, Dresser & McKee
- Frigid Units
- Hach Environmental
- Commonwealth Biomonitoring and Turner Solutions

We would like to thank Newport Vineyards for offering complimentary tour and wine tasting vouchers that are available to attendees in the conference registration area.

The following individuals are very kind to offer their expertise as part of this year's Taxonomy Fair: Gail Corkum (Acadia University), Bill Crouch (Fish and Wildlife Service), Karen Gaines

(University of New Mexico), Don Klemm (U.S. Environmental Protection Agency), Tracy Morman (North Carolina DEHNR), Dan Pickard (California Department of Fish and Game), Christopher Rogers (Kansas Biological Survey at Kansas University), Dave Ruiter, Ken Stewart (University of North Texas, Department of Biological Sciences), Rebecca Winterringer (Ecological Specialist, Inc.) and Mark Wetzel (Illinois Natural History Survey).

Meeting Sponsors

The following organizations (See also Page 18.) generously donated funds or services in support of the 2011 annual meeting of NABS:

Gift Level: \$500 to \$999

- GEI
- Hach Hydromet
- University of Minnesota - Duluth Natural Resources Research Institute

Gift Level: < \$500

- University of Maine

Support ALS Research

In honor of this year's recipient of the NABS Award of Excellence, Dr. Pat Mulholland, we are encouraging all meeting participants to make a pledge in support of the ALS Association. Amyotrophic Lateral Sclerosis (ALS), or Lou Gehrig's Disease, is an illness that Pat has been battling for two years. By helping to support research for a cure for ALS, we, as a scientific society, can make a difference.

The option of providing pledges and sponsorship in support of ALS research is pretty simple. Visit the ALS website (<http://webri.als.org>). Send the link to friends, family, colleagues, who will want to support the effort. For this event, we are partnering with the Rhode Island Chapter of the ALS Association, which is very excited about working with our society on this important campaign. Together, we can make a difference.

All NABSters and other interested parties can support this great cause. You do not need to be a runner, walker, volleyball player, just someone who cares. We have a "Pat Mulholland Team" page linked through the ALS Association's Rhode Island Chapter's homepage for all who want to contribute to ALS research.

Special Events and Activities

The Great Debate

Monday, 23 May, 16:00 – 17:30, RICC – Ballroom A

Topic: Benthic Science Has Little to Contribute to the Water Crisis Debate

Mike Paul will moderate this "light-hearted event on a reasonably serious topic" on Monday afternoon. Opposing the statement, saying that "Yes, it does!" will be Gene Likens, Jen Tank, and Walter Dodds. Supporting that statement, saying that "No, it doesn't" will be Carol Couch, Jay O'Keeffe, and Margaret Palmer.

Name Change Business Meeting

Monday, 23 May, 20:00-21:30, RICC – Ballroom A

ByLaws Information Session

Tuesday, 24 May, 12:30-13:30, RICC – Ballroom A

Public Event featuring Dr. Sandra Postel

Tuesday, 24 May, 19:30 – 20:30, RICC – Ballroom A

This lecture featuring Dr. Sandra Postel, founder and director of the Global Water Policy Project, is open to the public. A leading authority and prolific author on international water issues, Postel has been hailed for promoting the preservation and sustainable use of freshwater. As Freshwater Fellow of the National Geographic Society, she serves as lead water expert for the Society's Freshwater Initiative.

Dr. Postel is recognized as one of the world's most respected authorities on freshwater issues and hailed for her "inspiring, innovative and practical approach" to promoting the preservation and sustainable use of Earth's fresh water. A Pew Scholar in Conservation and the Environment, Postel was awarded the "Scientific American 50" for her contributions to water policy in 2002. She is the author of *Pillar of Sand: Can the Irrigation Miracle Last?* and the award-winning *Last Oasis: Facing Water Scarcity*, and co-author, with Brian Richter, of *Rivers for Life: Managing Water for People and Nature*.

Dr. Postel has served as consultant to The Nature Conservancy, the World Bank, and the U.S. National Intelligence Council, and an advisor to American Rivers. From 1988 until 1994, she was vice president for research at the Worldwatch Institute. She has served as a commentator on CNN's "Futurewatch," appeared on major U.S. television networks and on National Public Radio, as well as in numerous documentaries, including the BBC's *Planet Earth* and Leonardo DiCaprio's *The 11th Hour*. In 2010, Postel was appointed Freshwater Fellow of the National Geographic Society, where she is lead water expert for the Society's freshwater initiative.

"It's a Shore Thing: A Coastal Cabaret" – Entertainment and Mixer

Tuesday, 24 May, 21:00 – 23:30, RICC – Ballroom A

Following the presentation by Dr. Postel, enjoy a reception and musical entertainment.

Tap your feet and get down with nonpoint source pollution, invasive species, watershed management, and anthropogenic impacts on natural systems. A calypso beat meets coral reefs. Move to the rhythm of fecund ecosystems in *The Estuarine Beguine*. This is a musical treat for geeks and hipsters alike. This part of the evening was organized by Judith Swift & Charles Cofone.

5K Fun Run

Wednesday, 25 May

Participants will be transported by bus to Goddard Memorial State Park. The buses will depart promptly at 4:00. Meet in the lobby of the convention center on the Sabin Street side prior to the 4:00 p.m. departure time.

The race is planned to take place in Goddard Memorial State Park in Warwick, near the southern edge of Providence. The route includes some rolling hills, but the beautiful setting will make this an extremely pleasant little trip through the Park. Race coordination and timing services will be provided by Meredith Nelson, Organization Plus, Kingston, Rhode Island.

Water and your race t-shirt will be available at the race. Pre-registration is required. If you would like to participate in the run and have not registered to do so previously, you may sign up at the conference registration desk until noon on Monday.

Volleyball Tournament

Wednesday, 25 May

Participants will be transported by bus to the sports complex. The buses will depart promptly at 4:00. Meet in the lobby of the convention center on the Sabin Street side prior to the 4:00 p.m. departure time.

The tournament will take place at a sports complex in nearby Cranston, Rhode Island, and it should be an exciting event for all of you volleyballers out there.

Water and your t-shirt will be available at the event. Pre-registration is required. If you would like to participate in the volleyball tournament and have not registered to do so previously, you may sign up at the conference registration desk until noon on Tuesday.

NABS Business Lunch & Vote

Wednesday, 25 May, 12:00-13:30, Westin– Narragansett Ballroom

A vote on the society name and bylaws changes will take place.

Banquet

Wednesday, 25 May, 19:00 – 21:00, Westin– Narragansett Ballroom

The 2011 annual NABS banquet will take place at the Westin Hotel in the Narragansett Ballroom. This event is for all meeting attendees. Following dinner, in the Westin's Providence Ballroom, entertainment will be provided by The Benthic Balladeers, a group of NABS-member musicians led by Fred Benfield. This will be an evening of fun and lively entertainment.

Student Events and Activities

GRC Meeting

Monday, 23 May, 12:15 – 13:45, RICC Room 557

Graduate students interested in GRC activities are invited to attend this meeting. The meeting will take place at the same time as other NABS committee meetings. Box lunches will be available on a first come, first served basis.

GRC Student Mixer

Monday, 23 May, 18:30 – 20:00, RICC - Rotunda

This event is for students only. The NABS Annual Student-Mentor Mixer is designed to facilitate interactions between students and experienced professionals from a variety of benthos-related careers. Students were asked to register online with their conference registration.

Live & Silent Auctions

All funds raised from the live and silent auctions will go into the NABS Endowment that serves as the source for research and travel awards presented to graduate students. A silent auction of books donated by publishers will start on Monday, 23 May, and will close on Wednesday, 25 May. Silent auction items will be located in the RICC 5th Floor Prefunction Area near the registration desk. A live auction featuring an assortment of items provided by society members, vendors, and others will take place at the banquet on Wednesday evening.

Meeting Souvenirs

Profits from these items support Graduate Student activities and awards. The GRC merchandise booth is located in the RICC 5th Floor Prefunction Area near the registration desk. Attendees are encouraged to buy the following items that will bear the meeting logo:

- T-shirt: \$15, sizes S, M, L, XL
- Long-sleeved shirt: \$17, sizes S, M, L, XL
- Hoodie: \$30, sizes S, M, L, XL
- Ceramic mug: \$8

If you purchased an item prior to the meeting, you can pick it up in the GRC merchandise booth during the meeting.

Post-Meeting Field Trip Excursions

Attendance of the field trips is limited and advance reservations are required. Depending upon space availability, if you did not sign up prior to the meeting, you may do so on-site by noon on Wednesday, 25 May.

Block Island, Rhode Island

Friday, 27 May

Participants will be transported by bus to the Block Island Ferry landing. The buses will depart promptly at 7:30 a.m. Meet in the lobby of the convention center on the Sabin Street side prior to the 7:30 a.m. departure time.

Block Island is a small island lying just over 19 km off the coast of Rhode Island, only 6,200 acres in size, but 40% of the island is preserved. There are over 40 km of walking trails open to the public, 27 km of free, public beaches, dramatic bluffs and many preserved open spaces including Clay Head Preserve, Fresh Swamp Preserve, the Hodge Family Wildlife Preserve, Rodman's Hollow, and more. We plan to visit a couple of reserves, with an expert from the Rhode Island Chapter of The Nature Conservancy. The diverse array of habitats on the island support over 40 state and federally listed rare or endangered species, including the globally endangered American burying beetle (very cool "bug"). Because of the incredible natural, and cultural history of this small island, the Nature Conservancy has designated Block Island as "One of the 12 last great places in the Western Hemisphere." The island is easily accessible by ferry for day (or overnight) trips from either Newport or Point Judith (both of which are a half-hour drive from Providence), and the best way to explore the island is by bike or moped. There are easily seven or eight places to rent bikes (or mopeds) on the island, some of which are within easy walking distance from the ferry landing.

The trip includes transportation and the cost of the ferry to Block Island (same-day, round-trip service from Point Judith, RI). If par-

ticipants choose to explore the island by bike or moped, they should anticipate added cost for rental. Lunch will be on your own.

Cape Cod National Seashore

Friday, 27 May

Participants will be transported by bus to the Cape Cod National Seashore in nearby Massachusetts. The buses will depart promptly at 8:00 a.m. Meet in the lobby of the convention center on the Sabin Street side prior to the 8:00 a.m. departure time.

A day-trip from Providence to Cape Cod National Seashore will offer guided walks and drives through spectacular coastal scenery and fascinating ecosystems. Like Block Island, the Cape includes a diverse array of habitats, terrestrial, marine and freshwater, including coastal plain ponds and dune swales, and the visit will be at the height of the spring season. There are also many marine habitats, including tidal flats, salt marshes, and soft-bottomed benthos. Cape Cod was a terminal moraine at the end of the last glacial period, and the sandy soils and strong winds provide a unique setting for stunted coastal forests, pitch pine-scrub oak barrens and kettle ponds, among other things. With the major stress of human development over the last century, the National Seashore is a treasure for both research and recreation in New England. This trip provides the opportunity to visit what is truly a national treasure, a "can't miss" trip for all.

The cost of the trip includes transportation and a box lunch.

Open House and Tour of Edna W. Lawrence Nature Lab at RISD

Wednesday, 25 May , 15:00 – 18:00

Founded in 1937, the Nature Lab of the Rhode Island School of Design houses a hands-on natural history collection and studio environment that offers opportunities to explore the patterns, structures and interactions of the natural world. Students at the Nature Lab explore the connections among art, design, science, and nature through laboratory and library resources, living specimens and digital imaging.

Particularly for our NABS 2011 conference the Nature Lab is hosting "Intimate Immensity," a collaborative exhibit by Lauren Hartsell and Henrik Søderstrøm. It features a small house out of reclaimed materials (8' wide x 16' long x 9' tall), in which two walls are large paintings celebrating the beautiful properties of water in natural environments. The house is "inhabited" by self-supported garments which are portraits of people in South Africa affected by lack of water access. The garments, made by Lauren, are constructed from fabrics and beads made by South African artists; the piece includes written stories about these individuals. Lauren, a RISD graduate with a BFA in Textiles, has worked with NGO's in South Africa. Henrik is a RISD graduate, an artist, teacher, and idea enthusiast.

The Nature Lab will hold an open house for NABS attendees on Wednesday from 15:00 to 18:00, with an informal tour of the Nature Lab at 16:00. The exhibit will also be accessible during the Nature Lab's hours Sunday (12:00 – 18:00) and Monday through Thursday (07:45 – 22:00); visitors can ring the bell, or wait for a student to come through the door! Directions to the Lab are available at the conference registration desk. Participation is free.

Information About Providence

The Providence Warwick Convention & Visitors Bureau (www.Go-Providence.com) will have a table set up near registration throughout the conference. The table will be manned by representatives of the CVB during the following hours.

Sunday, 22 May.....	16:00 – 19:00
Monday, 23 May	11:00 – 13:00 and 16:30 – 18:00
Tuesday, 24 May	11:00 – 13:00 and 17:00 – 18:30
Wednesday, 25 May	11:00 – 13:00
Thursday, 26 May.....	11:00 – 13:00

A full-service Visitor Center will be open Monday – Saturday, 09:00 – 17:00 at the convention center as well.

Opening Session Agenda

Sunday, 22 May 2011, 19:00 – RICC Ballroom A

- Welcome and Presidential Address – Lucinda Johnson
- Distinguished Service Award – Dr. Fred Benfield
- Environmental Stewardship Award – Dr. Susan Davies
- Award of Excellence – Dr. Pat Mulholland
- Hynes Award – Dr. Debra Finn

Welcome & Presidential Address

Lucinda B. Johnson

*The Benefits and Challenges of Using
Multiple Approaches and Multiple Scales for
Answering Complex Questions*

As we struggle to understand the causes and consequences of widespread and interacting disturbances it is increasingly clear that

no single approach can provide the knowledge needed to propose appropriate solutions. Regulatory and management agencies and researchers studying fundamental ecosystem processes are benefiting from studies that combine laboratory and field experiments, small to large scale empirical studies, mechanistic models informed by empirical data. Studies of complex processes benefit from multiple lines of evidence, but require new ways of thinking and new analytical approaches to be well understood and accepted. Examples from studies of impacts of mountain top removal mining on stream ecosystems, mussel biodiversity and conservation, lyme disease ecology, and amphibian conservation and health will be presented to illustrate some of the benefits and drawbacks of using these approaches.

2011 Distinguished Service Award

Fred Benfield

The Award of Excellence and Distinguished Service Award Subcommittee is pleased to announce that Dr. Fred Benfield is the 2011 recipient of the NABS Distinguished Service Award. Fred is a Professor of Ecology at Virginia Tech University. He has been unselfishly committed to serving NABS and its members for over 30 years. His service contributions include the

NABS Presidency from 1994 to 1995, member and Chairperson of the Executive Committee for two terms, and member and Chairperson of the Board of Trustees of the Endowment Fund. In addition, he has served as program chair for two meetings (Roanoke and Blacksburg). Fred has also contributed significantly to our journal. He played a major role establishing *J-NABS* and was a member of the first Editorial Board and chaired the Editorial Policy Committee. From 1989–1990 he served as Interim Managing Editor, then served another three-year term (1993–1996) on the Editorial Board. Since 1996 he has served as the *J-NABS* Book Review Editor. We are sincerely grateful for Fred's long and diverse service to the NABS.

2011 Environmental Stewardship Award

Susan P. Davies

Susan Davies has a bachelor's degree from Columbia University and a master's degree in aquatic entomology from the University of Maine. She has long been dedicated to finding new ways to evaluate, monitor, and protect aquatic ecosystems. From 1983 to 2003 she was manager of the Maine Department of Environmental Protection (MDEP) Biological Monitoring Program and is now water quality standards coordinator for the Department. In 1997-1998 she was invited to work with the EPA National Biocriteria Program in Washington, D.C. on large river bioassessment and national biocriteria implementation issues. From 1998 to 2003 she and Susan Jackson of the EPA National Biocriteria Program co-chaired the EPA Tiered Aquatic Life Uses (TALU) National Workgroup that developed the Biological Condition Gradient model. In 2003, Susan, David Courtemanch and Leon Tsomides, from the MDEP Biomonitoring Program were recognized with an Environmental Merit Award for Lifetime Achievement from Region 1 EPA, in recognition of the State of Maine's innovative and effective use of biological information in water quality management.

Susan also has a long, distinguished NABS service record. In 1987 she served on the Local Arrangements Committee for the Orono, Maine meeting. She served as the NABS secretary from 1995-1996, and created, then chaired, the Technical Issues Committee from 1999-2004.

2011 Award of Excellence

Pat Mulholland

The Award of Excellence and Distinguished Service Award Subcommittee is pleased to announce that Dr. Patrick Mulholland is the 2011 recipient of the NABS Award of Excellence in Benthic Science. Pat has been on the leading edge of benthological research for over 30 years and his scientific accomplishments are unquestionably profound and transformative. During much of his career, Pat's research has focused on stream structure and function. In particular, he is considered the leading expert on nutrient dynamics in stream ecosystems and has made significant contributions to our understanding on how watershed hydrology influences stream nutrient and organic carbon concentrations. Much of Pat's research in the past 10 years has focused on nitrogen dynamics in streams. He has been an inspirational leader and mentor in several large multi-collaborator

projects, including the Lotic Intersite Nitrogen Experiments (LINX I and LINX II). More recently, Pat has served as team manager for the National Observatory Network's (NEON) aquatic experiment (STREON). Pat also has served on multiple review panels and advisory boards (EPA, Coweeta LTER and Everglades National Park), and has been named a fellow of the American Association for the Advancement of Science and the American Geophysical Union. This recognition speaks to his national and international reputation. A long time member of NABS, Pat has served the society in a number of capacities, including member and chair of the Executive Committee and of the Board of the Endowment Trust Committee, and as an Associate Editor of *J-NABS*. Pat is a distinguished research staff member in the Environmental Sciences Division at Oak Ridge National Laboratory.

2011 Hynes Award for New Investigators

Debra S. Finn

The Hynes Award for New Investigators is given to a benthic scientist, recently graduated with their final degree, who was senior author of an outstanding primary publication in benthic science published within the last three years. The

2011 award goes to Dr. Debra S. Finn for her paper: "Demographic stability metrics for conservation prioritization of isolated populations", published in *Conservation Biology* in 2009 (23: 1185–1194).

The paper draws on population genetic theory to derive a composite metric of "demographic stability", which relates observed patterns of mtDNA sequences to a population's recent history in terms of connectivity, expansion, and bottlenecking. Dr. Finn tested the theory with empirical data from streams and found that habitat measurement was a robust predictor of observed genetic patterns. The Hynes Award subcommittee agreed the paper was an excellent example of how benthic ecology can be fertile ground for identifying fundamental processes in ecology and evolution. Moreover, the combination of theory and empirical work made for a powerful approach, the first using population genetics to gain the Hynes Award.

Dr. Finn is currently a Marie Curie International Fellow at the University of Birmingham. Since finishing her PhD at Colorado State University in 2006, she has also held post-doctoral positions at EAWAG (the Swiss Federal Institute of Aquatic Sciences and Technology), Oregon State University, and the Australian Rivers Institute.

Plenary Sessions

Charles J. Vörösmarty, Director, The City University of New York's Environmental Crossroads Initiative, The City College of New York

Presentation Title: Global Water Crisis? Yes... and Closer Than You Think

Charles J. Vörösmarty is a professor of civil engineering, a Distinguished Scientist with NOAA-Cooperative Remote Sensing Science and Technology Center and director of The City University of New York's Environmental Crossroads Initiative at The City College of New York. His research focuses on the development of computer models and geospatial data sets used in synthesis studies of the interactions among the water cycle, climate, biogeochemistry and anthropogenic activities. His studies are built around local, regional and continental to global-scale modeling of water balance, discharge, constituent fluxes in river systems and the analysis of the impacts of large-scale water engineering on the terrestrial water cycle. Before he came to The City College of New York, he was a research full professor at the Institute for the Study of Earth, Oceans and Space at the University of New Hampshire, where he was founder and director of its Water Systems Analysis Group (<http://www.wsag.unh.edu>).

Dr. Vörösmarty is a founding member of the Global Water System Project that represents the input of more than 200 international scientists under the International Council for Science's Global Environmental Change Programs. He is spearheading efforts to develop global-scale indicators of water stress, to develop and apply databases of reservoir construction worldwide and to analyze coastal zone risks associated with water diversion. He recently won one of two national awards through the National Science Foundation to execute studies on hydrologic synthesis.

Dr. Vörösmarty also is on several national and international panels, including the U.S. Arctic Research Commission, the NASA Earth Science Subcommittee, the National Research Council Committee on Hydrologic Science, the National Science Foundation's Arctic System Science Program Committee and the Arctic HYDRA International Polar Year Planning Team. He also was on a National Research Council panel that reviewed NASA's polar geophysical data sets, the decadal study on earth observations, and is co-chair of the National Science Foundation's Arctic CHAMP hydrology initiative. He has assembled regional and continental-scale hydro-meteorological data compendia, including the largest single collection, Arctic-RIMS (covering northern Eurasia and North America). He was a consultant to the 24-agency United Nations World Water Assessment Programme and represented the International Council of Scientific Unions at the recent UN Commission on Sustainable Development meetings.

9:30 – 10:15

Gene Likens, Distinguished Senior Scientist, Founding Director and President Emeritus of the Institute of Ecosystem Studies, Cary Institute of Ecosystem Studies

Presentation Title: Water: The Challenging Interface between Scientific Understanding and Policy

Gene E. Likens is a limnologist best known for his discovery of acid rain in North America with colleagues, for co-founding of the Hubbard Brook Ecosystem Study and for founding

the Institute of Ecosystem Studies, an international ecological research and education center. Dr. Likens is an educator and advisor at state, national, and international levels. He has been an advisor to two governors in New York State and one in New Hampshire, as well as one U.S. President. He holds faculty positions at Yale, Cornell, Rutgers, SUNY Albany, Jinan University (Guangzhou) and the University of Connecticut, and has been awarded nine honorary doctoral degrees.

In addition to being elected a member of the National Academy of Sciences and the American Philosophical Society, Dr. Likens has been elected to membership in the American Academy of Arts and Sciences, the Royal Swedish Academy of Sciences, Royal Danish Academy of Sciences and Letters, Austrian Academy of Sciences, and an Honorary Member of the British Ecological Society.

In June 2002, Dr. Likens was awarded the 2001 National Medal of Science, presented at The White House; and In 2003 was awarded the Blue Planet Prize (with F. H. Bormann) from the Asahi Glass Foundation. Among other awards, in 1993 Dr. Likens, with F. H. Bormann, was awarded the Tyler Prize, The World Prize for Environmental Achievement, and in 1994, he was the sole recipient of the Australia Prize for Science and Technology. In 2009, he was awarded the Einstein Professorship from the Chinese Academy of Sciences.

Dr. Likens is past President of the International Society of Theoretical and Applied Limnology, the American Institute of Biological Sciences, the Ecological Society of America, and the American Society of Limnology and Oceanography. Dr. Likens is the author, co-author or editor of 23 books and more than 550 scientific papers.

Curt Spaulding, EPA Region 1 Administrator, and Former Director, Rhode Island "Save the Bay" Program

Presentation Title: Managing Water in a Changing Climate: A New England Perspective

Curt Spaulding, EPA Region 1 Administrator, and former director of the Rhode Island "Save the Bay" program will discuss water issues critical to Rhode Island and the surrounding New England region.

H. Curtis "Curt" Spaulding has extensive experience in the environmental protection field as an advocate, policy analyst and administrator. For almost 20 years, he served as executive director of Save The Bay in Rhode Island, a nationally recognized, 20,000-member environmental advocacy and education organization. He established the Narragansett BayKeeper and Habitat Restoration programs, which reconnected Save The Bay to ecologically important bay issues, and he oversaw the successful completion of the \$9 million Explore The Bay Campaign and construction of the Save The Bay Center at Fields Point in Providence, Rhode Island.

Prior to joining Save The Bay, Spaulding was an environmental protection specialist and presidential management intern at EPA's offices in Boston and Washington, D.C. Spaulding received his bachelor's degree from Hobart College and an M.P.A. from SUNY at Albany in Albany, NY.

08:40 – 09:20

Carol Couch, Senior Public Service Associate, University of Georgia, College of Environment and Design, Program in Environmental Planning

Presentation Title: Southeastern Water Resources: Scarcity in the Midst of Abundance?

Carol A. Couch is senior public service associate in the University of Georgia College of Environment and Design, Program in Environmental Planning. Her sixteen-year public service career has combined ecological research with scientific and executive leadership at state, regional and national levels. From 2003 through 2009 she was the Director of the Georgia Environmental Protection Division and Chairperson of the Georgia Water Council which developed Georgia's first Statewide Comprehensive Water Resources Conservation and Development Plan. As EPD Director she was responsible for administering 26 state and 4 federal laws to protect, conserve or restore Georgia's air, land and water resources. These responsibilities included implementing Georgia's Drought Response Plan and directing the Interagency Drought Emergency Response Team. From 1992-2002, she was a member of the United States Geological Survey, U.S. Department of Interior, serving as Southeastern Regional Biologist and as Chief of Ecological Synthesis for the National Water Quality Assessment Program.

Awards and recognitions include the Superior Service Award of the U.S. Department of Interior, the Ivan Allen Legacy Award for Civic Leadership from Georgia Tech, and recognition in 2008 and 2009 by Georgia Trend as one the 100 most influential Georgians.

Carol Couch currently serves as the Chairperson of the Governor's Georgia-South Carolina Savannah River Advisory Team, and on the Executive Council of the NOAA National Integrated Drought Information System. She teaches landscape ecology and interacts with planners and designers as the "ecologist at the design table" in the creation or regeneration of resilient landscapes and watersheds. Her current focus is the development of ecologically-based climate change vulnerability and risk assessment tools for local government application. She earned a PhD in Ecology from the University of Georgia, a MS from the University of South Carolina and a BS from the Georgia Institute of Technology.

Jay O'Keeffe, Freshwater Ecologist, Environmental Learning Research Centre, Rhodes University, Grahamstown, South Africa

Presentation Title: Balancing Use and Protection: IWRM for Rivers

Professor Jay O'Keeffe is currently back in South Africa (where he will be contributing to a number of research and consultancy projects) after 6 years as WWF Professor of Freshwater Ecosystems in the Department of Environmental Resources at UNESCO-IHE, Institute for Water Education, Delft, the Netherlands.

Professor O'Keeffe's main research interests are in rivers and in catchment management planning, with a particular focus on flow requirements to maintain the ecological functioning of rivers, and the resulting goods and services which they provide for people. He was involved in the development of the environmental principles which were included in the 1998 South African Water Act. He is a strong advocate of inte-

grated water resource management and, as the former Director of the Institute for Water Research (IWR) in South Africa, he facilitated multi-disciplinary teams to solve problems at a catchment scale.

As WWF Professor, O'Keeffe initiated a series of training and capacity building projects to assess environmental flows in river basins where WWF has teams working. To date, as well as post-graduate courses in Delft, research and training courses have been completed, or are in progress, in South Africa, Kenya, Tanzania, South Africa, Bosnia, Turkey, India, Pakistan, China, Brazil, Ecuador, Peru and Mexico.

Student Awards

One hundred fifty nine oral presentations and 117 posters were evaluated by judges at the 2010 NABS conference in Santa Fe, New Mexico. In addition to the awards, each recipient received a book donated by the University of California Press. Many thanks to Chuck Crumley for organizing the UC Press book award.
